Subject: Micro\$oft is corrupt... Are you?

Q: Why do cars run on polluting gasoline rather than clean burning alcohol?

A: Because of a Big Business deal between Ford and Rockefeller to sell off gasoline, the by-product of coal refining, rather than use corn based alcohol that would support the poor American farmers.

Q: Why do cars still run on gasoline after the environmental and international damages are so apparent?

A: Perhaps because of lobbying generations of corrupt government officials?

Q: Why do ALL major consumer PCs come with a 'Microsoft Tax?' Why can't I buy a PC to use with whatever operating I choose?

A: Because of threats from Microsoft to be PC manufacturers to be left out of their 'standards.'

Q: Why is Microsoft still operating unchecked by the government after nearly ruining the computer industry?

A: Please reply to this message with a good one.

\$1 billion for education? What is the point of training our children to work in the computer industry at the cost of killing the industry?
